### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian W. Oaks on September 20, 2005. The application has been amended as follows:

**In the claims:**

**Claim 17:**

An asynchronous transfer mode switch comprising: a plurality of line cards, each line card operable to receive a request to set up a call; and a processing card operable to reject the request to set up the call based on a current load value associated with a processor, a load threshold, associated with the processor, and an average load value associated with the processor, wherein the processing card comprises a load calculator operable to perform a load calculator task and a load integrator operable to calculate and store the current load value based on a result from the load calculator.

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 5, 8, 10, 17, the prior art either alone or in combination failed to teach a method for handling call set-ups in telecommunications network comprising: comparing a first load value for a switch to a load threshold for the switch; allowing the call to be set up when the first load value is less than the load threshold; comparing a second load value to the load threshold in response to the first load value being greater than or equal to the load threshold;

Art Unit: 2682

and allowing the call to be set up allowing the call to be set up when the second load value is less than the load threshold. In addition, the prior art failed to teach the features of a load integrator operable to calculate and store a current load value associated with a processor and operable to calculate and store an average load value associated with the processor; and a call rejection module operable to reject a request to set up a call based on the current load value and a load threshold. Furthermore, the prior art failed to teach the features of a processing card operable to reject the request to set up the call based on a current load value associated with a processor, a load threshold, associated with the processor, and an average load value associated with the processor, wherein the processing card comprises a load calculator operable to perform a load calculator task and a load integrator operable to calculate and store the current load value based on a result from the load calculator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marceau Milord whose telephone number is 571-272-7853. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Corsaro can be reached on 571-272-7876. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
